GREEN ENERGY

CONVERSATION

Sophie: Did you hear that? Carbon dioxide just hit record levels. Honestly, that's scary.

Daniel: Yeah, it's pretty alarming. If governments don't step up soon, the greenhouse effect is only gonna get worse.

Sophie: Exactly! That's why it's essential that governments invest in solar power and wind power.

Daniel: True, but let's be real... big corporations have to pull their weight too. It's vital that each company adopt cleaner practices and be held accountable.

Sophie: Absolutely. And it's not just governments and corporations — we all need to understand our role. That's why I think it's vital that schools teach about global warming and carbon dioxide, so everyone knows why it's serious.

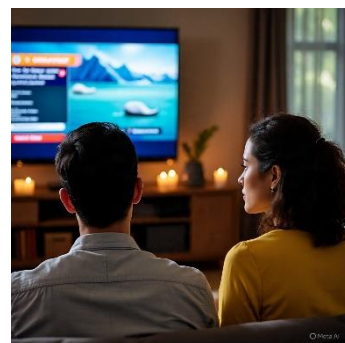

Daniel: Totally agree. Even small moves help. I suggest that we install some solar panels at home.

Sophie: Love that idea! And I'd recommend that our neighbors do the same, maybe switch to eco-friendly products too.

Daniel: Definitely. At the end of the day, it's crucial that everyone take responsibility, not just scientists or politicians.

Sophie: Couldn't agree more. Watching all these floods and wildfires on the news... it just shows how urgent it is that people act now.

Daniel: Yeah... maybe if more people understood the impact, we'd see real change a lot faster.

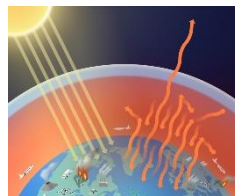

VOCABULARY

Carbon dioxide

Global warming

Greenhouse
effect

Gas emissions

Solar energy

Solar panels

Wind energy

Electric cars

LANGUAGE PRACTICE

Subjunctive mood

It's urgent that
gas emissions **be**
reduced
immediately.

I **insist** that the
government
enforce policies to
lower carbon
dioxide levels.

Subjunctive mood: words commonly used

Adjectives	essential, vital, crucial, important, urgent, critical, mandatory
Verbs	suggest, recommend, insist, propose, demand

UNIT
68

GREEN ENERGY

EXERCISE 1

Complete the sentences using the subjunctive.

- A. It's essential _____ that people use more solar energy _____ (solar energy).
- B. It's vital _____ (global warming).
- C. It's urgent _____ (more responsibility for carbon dioxide emissions)
- D. It's crucial _____ (gas emissions)
- E. It's important _____ (solar panels at home)

EXERCISE 2

Complete the sentences using the subjunctive.

- A. I suggest _____ that the whole neighborhood install solar panels _____ (solar panels)
- B. I recommend _____ (eco-friendly products)
- C. I insist _____ (solar power)
- D. I propose _____ (greenhouse effect)
- E. I insist _____ (more responsibility for carbon dioxide)

SUMMARY

Structure	Use	Examples	Common words
It's + adjective + that + subject + base verb	Express necessity, importance, urgency, or recommendation	It's essential that governments invest in solar power. It's urgent that people take responsibility.	essential, vital, crucial, important, urgent, critical, mandatory
Verb of suggestion/recommendation + that + subject + base verb	Suggest or recommend an action	I suggest that we install solar panels I recommend that schools teach about global warming.	suggest, recommend, insist, propose, demand

*The verb after “that” does not change according to the subject: always use the base verb.

Correct: I suggest that she **take** action.

Incorrect: I suggest that she **takes** action.
